Site Visit Checklist

A practical example checklist for preparing, conducting, and closing a routine workplace site visit.

SAMPLE - TRAINING USE ONLY | Version 1.0 | Sample date: November 9, 2026

Before the visit

- Confirm the fictional site reference, visit purpose, and expected arrival window.
- Review the previous visit notes and open follow-up items, if available.
- Identify who is authorized to grant access; do not store entry codes in the checklist.
- Prepare a list of questions and bring only approved, non-sensitive reference material.

During the visit

- Record the date, general location label, and people participating (use roles rather than personal details in this sample).
- Walk through relevant areas with an authorized site representative.
- Document observable maintenance, setup, and housekeeping needs factually, without guessing causes.
- Flag urgent safety concerns to the appropriate on-site contact; do not attempt work beyond your role.

Closeout and follow-up

- Summarize completed observations and outstanding needs.
- List each follow-up action, responsible role, and target date.
- Confirm which updates may be shared with the client and which need internal review.
- Send a concise summary using the standard client update format.
